Continuation of 5. does NOT place the application in condition for allowance because: of the reasons set forth in the Office Action of 01/04/2005. Additionally, the interface region of Fig. 3B of Mikhaylichenko et al. is defined by the region between the wafer and the brush. The region between the wafer and the brush defines a common boundary. The defintion does not state that the boundary has to be "touching between adjacent regions". If applicant intends the interface to be limited to the brushes and wafer touching, then the claim should be amended as such to include this limitation. Additionally, Fig. 3C, t2 shows supplying solution 207 to the interface between the rotating brushes and wafer.
